

Priyanshu Tiwari

7275901254 | Greater Noida, U.P | official.priyanshu.37@gmail.com | [linkedin.com/in/priyanshu/](https://www.linkedin.com/in/priyanshu/) | github.com/pds.37

SUMMARY

Third-year Computer Science student with strong foundations in **data structures, backend development, and machine learning**. Experienced in building scalable AI-driven applications and secure systems through projects and internship work. Interested in developing reliable technology solutions for complex financial and enterprise platforms.

EDUCATION

G L Bajaj Institute of Technology and Management
B.Tech in Computer Science and Engineering (CGPA: 8.608)
A S M P Public School
Secondary and Senior Secondary Education

Greater Noida, UP
Oct 2023 – July 2027
Balrampur, UP
2018 – 2022

SKILLS

Programming: C/C++, Python, JavaScript, SQL
Artificial Intelligence & Machine Learning: Supervised Learning, Regression, Classification, Model Evaluation
Data & Analytics: Data Analysis, Exploratory Data Analysis, Data Visualization
Web Development Concepts: REST APIs, Backend Development, System Design Basics
Cybersecurity Concepts: Network Analysis, Security Monitoring, Vulnerability Assessment

TOOLS & TECHNOLOGIES

Frameworks: React.js, Node.js, Express.js
Databases: MySQL, MongoDB
Libraries: NumPy, Pandas, Matplotlib, Scikit-Learn
Developer Tools: Git, GitHub, Docker, Postman, VS Code, PyCharm
Cloud Platforms: AWS, Google Cloud Platform (GCP)
Security Tools: Nmap, Wireshark, Burp Suite, Metasploit, Nessus, OWASP ZAP

EXPERIENCE

Software Development Intern – MERN Stack July 2025 – Sep 2025
SoftPro India
Developed MERN-based modules for a Hospital Information System including appointment management, feedback features, role-based authentication, secure routing, and automated record workflows.

PROJECTS

AI-Based Financial Threat Monitoring System | Python, Scikit-learn, Pandas, Streamlit Jan 2026 – Feb 2026

- Developed a machine learning pipeline to detect fraudulent financial transactions using supervised models including Random Forest and Logistic Regression.
- Implemented unsupervised anomaly detection using Isolation Forest to identify abnormal transaction patterns and potential financial security threats.
- Designed a risk-scoring mechanism and interactive dashboard to monitor suspicious transactions and support data-driven threat analysis.

Chanakya | Python, AI/ML, Distributed Systems Jul 2025 – Present

- Developed an **AI-based railway routing engine** to analyze traffic flow and optimize train scheduling, reducing simulated delays by **65%** and increasing throughput by **18%**.
- Built real-time monitoring dashboards for station masters and loco pilots to support operational monitoring and data-driven decision making.

ArogyaNest | MySQL, JavaScript, AI Analytics Aug 2025 – Dec 2025

- Built a secure multi-user health management platform with protected routes and structured health data storage.
- Integrated **AI-based anomaly detection and recommendation models** with a **140+ remedy knowledge library** and analytics dashboards.

COURSES & CERTIFICATIONS

DeepLearning.AI & Stanford University — Supervised Machine Learning: Regression and Classification
Palo Alto Networks — Cybersecurity Foundation
Amazon Web Services (AWS) — AWS Academy Graduate: Cloud Foundations
IBM SkillsBuild (AICTE) — AI/ML Virtual Internship
Infosys Springboard — Introduction to Artificial Intelligence
Cisco — Networking and Cybersecurity Certifications

LEADERSHIP & EXTRACURRICULAR

Joint Secretary, Rotaract Club of GL Bajaj July 2025 – Present
Organized campus events and student initiatives; awarded **Emerging Leader (2024)** for leadership contributions.
